

I have had an xm radio for approximately two years and feel that if I am paying for services for instant traffic and weather I should have my choice of who dices it to me. Doesn't xm radio have the same privileges under the right of free speech? I have to pay for my television and other viewing so I should have the right to choose whoever i want to listen to. I request and hope you reject NAB's petition 04-160 so I can choose what I want to hear and when and where i choose

on

thank you for your consideration
this important matter
